

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light green color. They are positioned diagonally, with the blue one partially covering the green one.

Gross Domestic Product

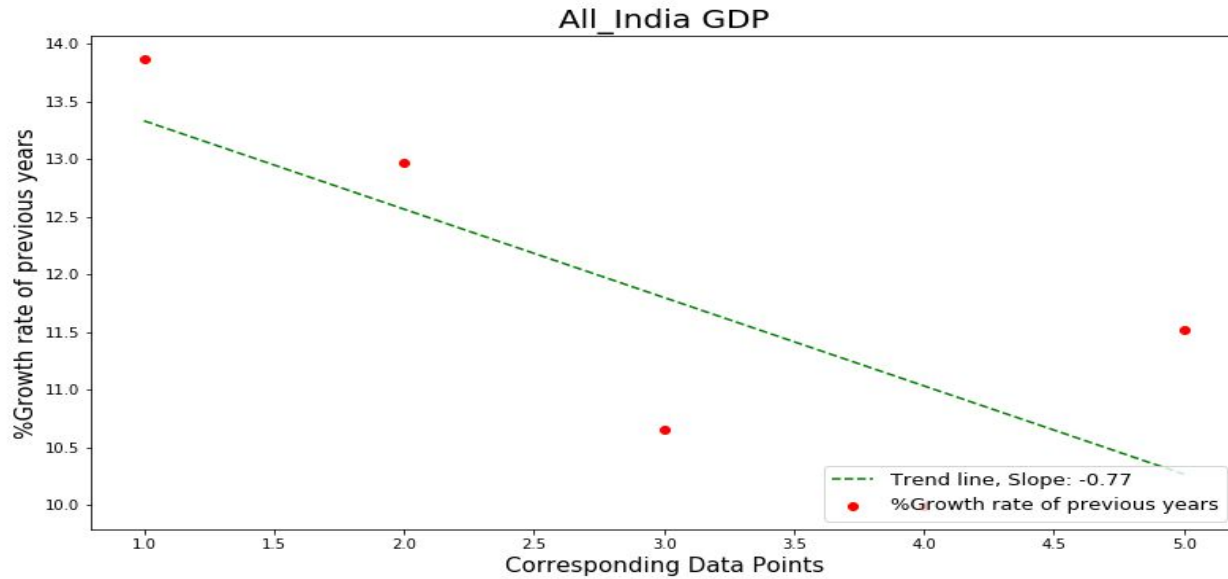

Jallepalli Prerna

Introduction

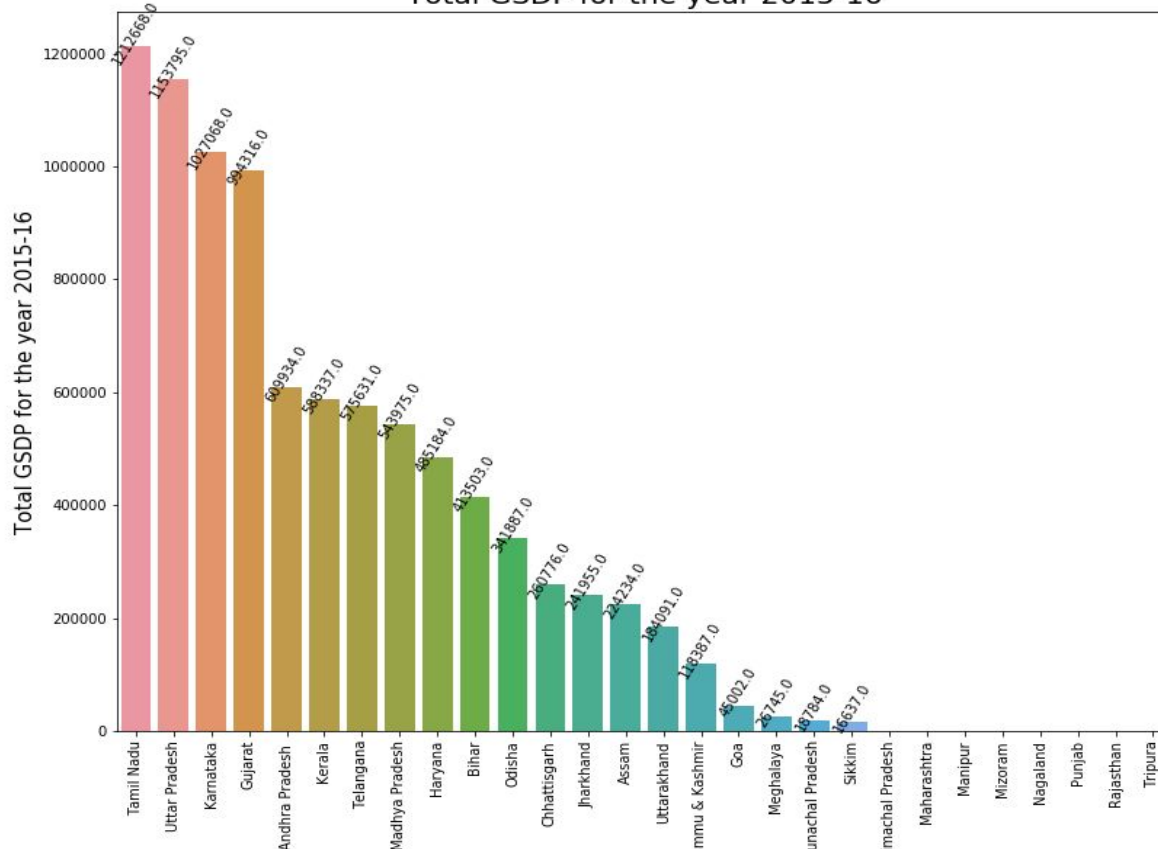

There has been a tremendous decrease in the Overall GDP of the Country.

We hereby present to you the Analysis of how our country has been performing over the previous years.

The All India GDP based on the previous data is decreasing.

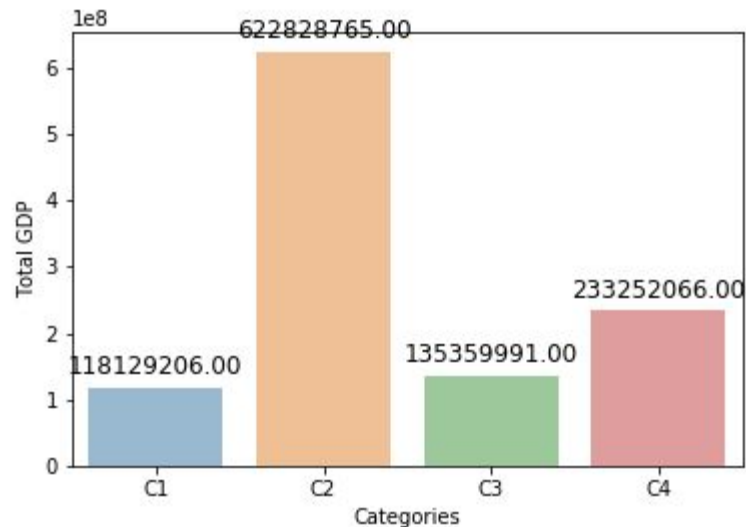

Total GSDP for the year 2015-16

In the year 2015-16:

The Total GSDP of Tamil Nadu stands the highest.

Ignoring the Null values that are present at the end of the plot, we observe that Sikkim stand at the lowest level having the least GSDP and falling back among all the states

Based on the data, we categorized states into 4 different types

From C1 to C4 based on quantile range. On the Per Capita of each state.

Following were ranges for each Category

0.85-1 -> C1

0.5-0.85 -> C2

0.2-0.5 -> C3

0-0.2 -> C4

According to this we can say that the States in Category 2 are contributing the most towards the total GDP

While States in Category 1 are contributing the least and need to improve.

THANK YOU
